Company

M-LOCKS BV

Founded in 2006, M-LOCKS is a well known producer and distributor of high-security locks and locking systems for safes and vault systems.

Trusted security that can be taken for granted
For us it is a matter of course that our products meet international standards and that they are certified by recognised institutes. Further more M-LOCKS is certified according to ISO 9001:2015. Trusted security that can be taken for granted.

Our philosophy is to stand close to our customers. Our M-LOCKS team is a team of specialists. Each one of them a specialist in their own field of expertise. We are well-known for our trusted, personal advice, our quick delivery, and service, all over the world. We are always open to your questions, comments and ideas. Feel free to contact us.

TechMaster

Important notes!

- Before installing this product, please carefully read the installation and operating instructions.

- Locks have been designed to correctly operate in a temperature range from -5°C (23°F) to + 50°C (122°F) and in an environment with non-condensing humidity between 25% and 90%.

- The lock must not be oiled/lubricated/greased.

- If installed in normal domestic or office environments, the locks do not require maintenance; in any case, after 10,000 opening/locking cycles, it is recommended to conduct a test that verifies the correct and complete operation of the product.

- Use only DURACELL™ 9 Volt Alkaline batteries, or battery holders with DURACELL™ 1.5 Volt Alkaline batteries. Alternatively, it is possible to use a 12VDC - 1A power adapter (p.n. N1212) with relative power supply interface (p.n. T6005/W or p.n. T6005).

- A long beep together with the message "LOW BATTERY" on the display, indicate a low battery level which needs to be immediately replaced.

- It is strongly recommended to change the default codes before use and to keep safely the new codes.

- Never use codes that can be easily guessed such as 123456, birth dates or based on other personal information.

- After changing a code, perform several opening/closing tests before closing the door.

<u>Should the lock label be removed, warranty is void.</u>

General information

Using your keypad

- Press any button to power up the keypad. LCD which displays:

  If more locks are installed, LCD displays:
  Enter the lock number to select it.

| ENTER CODE |
| X X – X X X X X X |

| SELECT LOCK |

- To enter a code, power up the LCD and enter the corresponding digits.

- LCD automatically switches OFF if no buttons are pressed within 30s.

- To scroll the menu, press ➡️.

- To confirm an operation or enter a menu press **OK**.

- To leave a menu and come back to the main menu, scroll the functions until "EXIT?" and press OK.

- To enter a code plus Dallas key (if programmed), enter the code digits and insert the Dallas key in the keypad reader.

- To enter a user provided with Dallas key only (if programmed), insert the Dallas key in the keypad reader. LCD displays:

| DALLAS USER |
| XX |

- To start a time delay counting (if programmed), enter a code. LCD displays:

| TIME DELAY |
| 00:59 |

- To stop a time delay counting (if programmed), press ➡️ and then confirm with **OK**

| STOP DELAY |
| COUNTING? |

  After time delay counting, LCD displays open window counting: Press **OK** and enter a code for opening.

| OPEN WINDOW |
| 00:01 |

- If a wrong code is entered, LCD displays the message:

| WRONG CODE |

- If a wrong dynamic/activation code is entered, LCD displays the message:

| WRONG DYNAMIC |
| CODE |

TechMaster

- If a dynamic/activation code is entered more than 30 minutes before its beginning validity time, LCD displays:

WRONG DYNAMIC CODE

- If a dynamic/activation code is entered more than 30 minutes later than its beginning validity time, LCD displays:

WRONG DYNAMIC CODE

- To open or access the menu in dual mode (if programmed), enter the first code. LCD displays:
  Then, enter the second code.

ENTER 2° CODE X X – X X X X X X

Shortcuts

Press and hold for 2 seconds the button related to the needed function:

0 = Change Manager code (01), users, override users, Master and Manager ovr (if configured)

1 = PIN entering for dynamic codes (after dynamic codes activation)

5 = Test mode

6 = access to Manager menu, Manager ovr menu (if configured) Change code menu, Time menu, Configuration menu and Master menu.

8 = System info and time and date info

➡ = Exit and back to the main menu

OK = Master menu

User properties and default codes

Users can be programmed for opening with code only, code + Dallas key or with Dallas key only. It is also possible to set a dual mode opening: in this case, entering the two users codes is required to open the lock.
Default codes are:

Master: 1-2-3-4-5-6-7-8.
Manager: 123456.

User instructions

TechMaster

Users from 02 to 90: 02-020202, 03-030303, and so on. They always open with time delay if programmed.

Override users: through to the setup software, it is possible to configure users in between 10 and 90 (10-101010, 11-111111, and so on) as override users. They always open without time delay.

The table below reports the functions for the main users.

Master	**Manager**
Access to Master Menu	Access to Manager Menu
Set time and date	Standard users management
Set Time Lock periods	Override users management
Audit download	Set time delay
Manager Management	Set variable time delay
Enable/disable OTCs	PC Link
Change code	Audit download
PC Link	Opening
	Code changing
	Set opening extension
	Set immediate time lock

Override manager	**Configuration menu**
Access to Ovr. Manager menu	Install/remove locks
Override users management	Set display contrast
Code changing	Change language
	Test mode
	Check system Information

Override users	**Standard users**
Opening	Opening
Change code	Set opening extension, if enabled
	Set immediate time lock, if enabled
	Code changing

This user manual describes the standard programming. According to such programming and unless different requests made while ordering the product, an opening can be performed by entering single users codes (no dual mode) and without time delay. Thus, the user manual must be adapted according the configuration selected.

It is strongly recommended to change the default codes before using the lock.

TechMaster

Overview functions

Lock opening
After entering an opening code, it is possible to open the lock within 3 seconds. It's no necessary instead with motorized locks: in this case indeed, the motor moves the bolt which remains in opening position for about 8 seconds before returning in closing position. In the manual closing version instead, the bolt can be closed by pressing ➡ key for few seconds.

Penalty
Four consecutive wrong codes initiate a four-minutes penalty time. During this period, LCD displays the message "PENALTY" and no operation is allowed.

Time Delay
Programmable time delay in between 0 and 99 minutes. Programmable opening window in between 1 and 19 minutes.

Dallas keys
It can be programmed for any lock. Available as option for Manager and users (not for Master). TechMaster keypad only works with Dallas keys created by M-LOCKS. Upon express request, the keypad can be set in order to work also with different Dallas key models.

Power supply
Lock can be powered with:
- an ALKALINE 9V battery located in the battery compartment below the keypad;
- an internal battery box (6 ALKALINE 1.5 batteries);
- A power adapter (ref. N1212) with power supply interface (ref. T6005/W or T6005).

Low battery warning
A long beep together with the message "LOW BATTERY" on the display, indicates a low battery level which should be immediately replaced.

Silent alarm
With this function enabled, enter an opening code increasing or decreasing by one number the last code digit (ex. 03-030304 or 03-030302 instead of 03-030303): the lock opens and simultaneously the output of the alarm interface or I/O interface is activated.

Audit
The lock saves the last 6000 operations with time, date, user and operations description. The keypad can save the last 250 operations. It is possible to download the events for locks and keypad by using the DMT Audit software. For further information refer to the IU_DMT_Audit_XX.

M·LOCKS

TechMaster

IMPORTANT
Some options/characteristics reported in this user manual, can only be used if previously programmed through the setup software. Therefore, please refer to the user manual IU_TechMaster_setup_XX. Please contact M-LOCKS for further information.

Opening the locks

Users (or Override users): opening without time delay

Power up the keypad. Enter an opening code and insert the Dallas key, if programmed. LCD displays:

OPEN

Open the lock within 3 seconds.

Users: opening with time delay

Power up the keypad. Enter an opening code and insert the Dallas key, if programmed.
LCD displays the time delay counting:

TIME DELAY 00:59

At time elapsed, the LCD displays the open window counting time.

OPEN WINDOW 00:01

Press **OK**, LCD displays:

ENTER CODE X X – X X X X X X

Enter an opening code and insert the Dallas key, if programmed. LCD displays:

OPEN

Open the lock within 3 seconds.

Manager (or Override Manager): opening without time delay

Power up the keypad. Press ➡ for opening with Manager code or press it two times for opening with Manager Ovr code. LCD displays:

MANAGER CODE X X X X X X

Enter Manager code and insert the Dallas key, if programmed (or enter Manager Ovr code and insert the Dallas key, if programmed). LCD displays:

OPEN

Open the lock within 3 seconds.

Manager (or Override Manager): opening with time delay

Power up the keypad. Press ➡ for opening with Manager code or press it two times for opening with Manager Ovr Code. LCD displays:

MANAGER CODE X X X X X X

Enter Manager code and insert the Dallas key, if programmed (or enter Manager Ovr Code and insert the Dallas key, if programmed). LCD displays the time delay counting:

TIME DELAY 00:59

Once the time delay has elapsed, the LCD displays the open window counting time.

OPEN WINDOW 00:01

TechMaster

Press ⏎ **OK**, LCD displays:

| ENTER CODE |
| X X – X X X X X X |

Press ➡ for opening with Manager code or press it two times for opening with Manager Ovr code. LCD displays:

| MANAGER |
| X X X X X X |

Enter Manager code/Manager Ovr code and insert the Dallas key, if programmed. LCD displays:

| OPEN |

Open the lock within 3 seconds.

Opening with dynamic codes (Dallas key option)

Power up the keypad. Insert the Dallas dynamic key in the Dallas reader. LCD displays:

| DYNAMIC CODE |
| X X X X X X X X X |

Enter the dynamic code and press **OK**. LCD displays:

| OPEN |

Open the lock within 3 seconds.

If programmed by the software Dyama or DyamaWeb for dynamic codes creation, LCD displays the closing code when the bolt re-closes. Please refer to the user manuals IU_Dyama_XX or IU_DyamaWeb_XX for further information.

| CLOSING CODE |
| 179 |

WARNING: dynamic codes must be used respecting the **sequence of activation time** in which they have been created by the software (Dyama or DyamaWeb), otherwise the last created code deletes all the previous ones (i.e. if three codes are created and the third one is used before using the first two ones, those first two codes are deleted). In this case indeed LCD displays:

| DYNAMIC CODE |
| DELETED |

Opening with dynamic codes (PIN option)

Power up the keypad. Press and hold **1** to enter the dynamic user PIN (optional). LCD displays:

| DYNAMIC USER |
| X X X X |

Enter the dynamic user PIN. LCD displays:

| DYNAMIC CODE |
| X X X X X X X X X |

Enter the dynamic code and press **OK**. LCD displays:

| OPEN |

Open the lock within 3 seconds.

If programmed by the software Dyama or DyamaWeb for dynamic codes creation, LCD displays the closing code when the bolt re-closes. Please refer to the user manuals IU_Dyama_XX or IU_DyamaWeb_XX for further information.

| CLOSING CODE |
| 179 |

WARNING: dynamic codes must be used within the **activation time** created by the software (Dyama or DyamaWeb), otherwise the last

| DYNAMIC CODE |
| DELETED |

created code deletes all the previous ones (i.e. if three codes are created and the third one is used before using the first two ones, those first two codes are deleted). In this case indeed LCD displays:

Dual mode opening without time delay

Power up the keypad. Enter an opening code and insert the Dallas key, if programmed. LCD displays:

2° USER CODE
X X – X X X X X X

Enter the second opening code and insert the Dallas key, if programmed.
LCD displays:

OPEN

Open the lock within 3 seconds.

Dual mode opening with time delay

Power up the keypad. Enter an opening code and insert the Dallas key, if programmed.
LCD displays the time delay counting:

TIME DELAY
00:59

When the time delay has elapsed, the LCD displays the open window counting time.

OPEN WINDOW
00:01

Press **OK**, LCD displays:

ENTER CODE
X X – X X X X X X

Enter an opening code and insert the Dallas key, if programmed. LCD displays:

2° USER CODE
X X – X X X X X X

Enter the second opening code and insert the Dallas key, if programmed.
LCD displays:

OPEN

Open the lock within 3 seconds.

Master menu

Power up the keypad. Press and hold **OK**. LCD displays:

MASTER MENU
X X X X X X X X

Enter Master code (default value 1-2-3-4-5-6-7-8).

Time & date settings

Enter the Master menu. Press ➡ until LCD displays:

TIME AND me
SETTINGS

Press **OK**. LCD displays the current time and date.

08:00   FRI
27/01/2006

Press **OK** to change time and date.

hh:mm   _ _ _
GG / MM / YYYY

Enter the new time and date values and press **OK** to confirm.

TechMaster

Time and Date recovery through DyamaWeb (OTC software)

This option can only be performed after activating the dynamic codes and the deletion of all static codes (including the Master code). For further information, see the paragraph **Dynamic codes activation with static codes deleting,** pg. 18. This option allows for the updating of the time and date values by using the keypad along with the DyamaWeb software. (for further information, see user manual IU_DyamaWeb_XX or IU_DyamaWebLite_XX).

Power up the keypad and press and hold [8] until the keypad firmware version is displayed.

Press [➡] until the LCD displays the current time and date.

| 08:00   FRI |
| 01/27/2006 |

Press and hold [0]. LCD displays:

| TIME/DATE ERROR |
| MODE ACTIVATED! |

Insert the blue Dallas key N1971 in the reader. LCD displays:

| TIME/DATE ERROR |
| XXXX XXXX |

Enter the 8-digits code displayed on the LCD into DyamaWeb software, to generate the dynamic code to access the Time & Date menu, to update time and date values.

Press [OK]. LCD displays:

| DYNAMIC CODE |
| X X X   X X X   X X X |

Enter the dynamic code generated by DyamaWeb software: LCD displays the current values for time and date.

Press [OK] to enter the new time and date values and press [OK] to confirm.

DST Settings

WARNING: it is recommended to enter this menu always with the door open.

Power up the keypad. Enter the Master menu. Press [➡] until LCD displays:

| AUTOMATIC DST |

Press [OK] one time and then press [➡] to select between *ON* and *OFF*. Press [OK] again to confirm.

If the static codes have been deleted, automatic DST can be enabled by using the dynamic user DST.

Time Lock settings

WARNING:
It is recommended to enter this menu always with the door open;

Master menu, allows to add/delete the settings for time lock/closing periods/opening periods, only if current time and date values are included in an opening period.

Power up the keypad. Enter the Master menu. Press ➡️ until LCD displays:

TIME LOCK SETTING

Weekly time lock settings – Adding new values

Enter Time Lock menu and press **OK**. LCD displays:

WEEKLY TIME LOCK T1 SETTING

Press ➡️ once or two times to set a weekly time lock T2 or T3. Then, press **OK**.

Press **OK**. LCD displays:

ADD NEW VALUES

Press **OK**. LCD displays the current day of the week.

🔓 hh:mm   FRI 🔒 hh:mm

The first entry is an opening time while the second entry is a closing time. Enter the new values.

Press **OK** to confirm. LCD displays the next day of the week, proposing the same time values. Press **OK** to confirm or ➡️ to select another day without entering new time values or else enter the new time values as previously illustrated.

At the end of the week, LCD displays:

END OF LIST EXIT AND SAVE? ✓

Press **OK** to save or ➡️ for coming back to the first weekday.

All values entered can be saved only by pressing **OK**.

Inside the Time Lock menu, opening time intervals are indicated: it means the safe can be opened by entering a valid code, but only inside the time interval itself (ex. opening time interval from 08.00 to 14.00 from Monday to Friday: the safe can be only opened from 08.00 to 14.00 and only in those days, it cannot be opened before 08.00 and after 14.00. Furthermore, safe cannot be opened on Saturdays and Sundays).
It is possible to schedule up to four times intervals per day (ex. Monday from 07.00 to 10.00, from 12.00 to 13.00, 15.00 to 16.00 and 18.00 to 19.00).

Weekly time lock settings – Verify or delete values

Enter Time Lock menu and press **OK**. LCD displays:

WEEKLY TIME LOCK T1 SETTING

Press **OK**. LCD displays:

ADD NEW VALUES

Press ➡️. LCD displays:

VERIFY OR DELETE VALUES

Press **OK**. LCD displays the values for the first day.

🔓 hh:mm   FRI 🔒 hh:mm

TechMaster

Press ➡ to scroll all the schedules list.

Press **OK** on a schedule. LCD displays:

DELETE VALUES? ✓

Press **OK** to confirm or ➡ to exit.

At the end of the list, press **OK**. LCD displays:

END OF LIST EXIT?

Closing periods (Holidays) – Add new values

Closing periods are time intervals in which is possible to close the lock even when a time lock is enabled.
It is possible to schedule up to 60 closing periods (they can be opening or closing periods).
Each period has a maximum time length of 14 days.
WARNING: during closing periods, the safe cannot be opened.

Enter Time Lock menu and press **OK** until LCD displays:

WEEKLY TIME LOCK T1 SETTING

Press ➡. LCD displays:

CLOSING PERIODS SETTING

Press **OK**. LCD displays:

Press ➡ to select between *AUTOMATIC* and *MANUAL* mode.

Press OK to confirm.

With *MANUAL*, lock can be closed by pressing and holding ➡ for 2 seconds.
With *AUTOMATIC* instead, lock automatically re-closes after the time set with Setup software.

TechMaster

Install I/O interface

WARNING: I/O interface must be in pre-setup mode before the installation. For further information regarding the I/O interface reset see the user manual II_T9355_IP_XX_eng. Furthermore, the lock with ID: 1 must be open.

Power up the keypad. Access Configuration Menu. LCD displays:	INSTALL LOCKS
Press ➡ until the LCD displays:	INSTALL I/O INTERF.
Press OK. LCD displays:	MASTER CODE X X X X X X X X
Enter Master code. LCD displays:	OPERATION DONE

Configure I/O Interface

Power up the keypad. Access Configuration Menu. LCD displays:	INSTALL LOCKS
Press ➡ until the LCD displays:	CONFIGURE I/O INTERFACE
Press OK. LCD displays:	RS485 ID 01
Press OK to confirm. LCD displays:	MASTER CODE X X X X X X X X
Enter Master code. LCD displays:	RS485 ID XX
Enter an ID RS485 and press OK to confirm. LCD displays:	OPERATION DONE

Remove I/O Interface

Power up the keypad. Access Configuration Menu. LCD displays:	INSTALL LOCKS
Press ➡ until the LCD displays:	REMOVEE I/O INTERFACE
Press OK to confirm. LCD displays:	MASTER CODE X X X X X X X X
Enter Master code. LCD displays:	OPERATION DONE

If Dynamic codes have been activated, along with the deletion of all static codes (including the Master code), it is possible to directly access the menus I/O interface configuration and I/O interface removal by entering a dynamic code for the user I/O CONFIGURATION USER.
For further information, see the paragraph **Dynamic codes activation with static codes deleting,** page 18.

Display contrast

Power up the keypad. Access Configuration Menu. LCD displays:

INSTALL LOCKS

Press ➡ until the LCD displays:

DISPLAY CONTRAST

Press OK. LCD displays:

ADJUST CONTRAST X

Enter a contrast level (between 1 and 9) and press OK to confirm. LCD displays:

OPERATION DONE

If Dynamic codes have been activated, along with the deletion of all static codes (including the Master code), it is possible to access the Display contrast menu by pressing and holding 1.
For further information, see the paragraph **Dynamic codes activation with static codes deleting,** page 18.

Temporary restoring of the display contrast

This option can only be accessed after activating the dynamic codes without deletion of the static codes.

Power up the LCD. Press and hold 8 until the LCD displays the keypad firmware version.

Keep pressed 3 for 3s: LCD contrast level is automatically set to "3" regardless the last contrast value set and it remains at "3" until the LCD is kept ON.

Keypad Language

Power up the keypad. Access Configuration Menu. LCD displays:

<div style="text-align:right">INSTALL
LOCKS</div>

Press ➡ until the LCD displays:

<div style="text-align:right">SYSTEM INFO</div>

Press **OK**. LCD displays keypad system information. Press **1** to see lock system info.

Press ➡ to see the current time and date.

Dynamic keypad ID and DyamaWeb software license

These options can only be used after activating the dynamic codes. For further information see the paragraph **Dynamic codes activation with static codes deleting,** page 18. If dynamic codes have been activated, along with the deletion of all the static codes (including the Master code):

Power up the LCD. Press and hold **8** until LCD displays the keypad firmware version.

Press ➡ once: LCD displays the ID of the keypad in which dynamic codes have been activated.

<div style="text-align:right">OTC ID
XXXXXXXX</div>

Press ➡ a second time: LCD displays the license number of DyamaWeb software version that manages the dynamic codes of the keypad and related locks.

<div style="text-align:right">DYAMAWEB
XXXXXX</div>
Press **OK** to exit.

If Dynamic codes have been activated without deletion of the static codes, it is possible to retrieve the information by accessing the Configuration menu, selecting System info option and pressing ➡.

Press **OK** to exit.

Correct disposal of this product:

(Waste Electrical & Electronic Equipment)

Applicable in the European Union and other European countries with separate collection systems.

This marking displayed on the product or its literature indicates that it should not be disposed with other wastes at the end of its working life.
To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.
